

## OM's Memory Tile

### What do you do when families take the ashes home?

Since most of your revenue sources have been usurped by cremation here's an idea. We have developed over the years and continue to produce 6"x6" black tiles that are lasered with name dates portrait and life elements for families to take home and place with the ashes. We call them the OM Memory Tile. Even if families choose to scatter it's an opportunity for the family to memorialize at home and a way for you to capture a few extra dollars in the ever shrinking cremation revenue market. We can do these quickly and inexpensively and as you can see (insert photo) they look great. Families that recognize the value and affordability have ordered 10-15 of them for all members of the remaining family. With special quantity discounts, these are an affordable way to encourage memorialization, increase revenue and endear families to your facility for services.

We will take the photo and the ideas of imagery (college logo, etc.) and get you a proof in record time allowing you to ensure your families satisfaction. The best news it can all be done electronically! So let your sales people and your families know about OM's Memory Tile. When you have lost everything to cremation, here's a way to get a little back.
